Medical Economics · January through December 1968

Each listing shows title of major article or short item (in italics). First two figures following title indicate date of issue; last figure indicates page number in that issue on which the article or item starts. Back copies of MEDICAL ECONOMICS may be purchased, as long as the supply lasts, at $2 each, postpaid.

AIDES

How to sell aides on office changes. 1-8-205
Let a nurse interview them first? 1-8-172
Maybe you need more business lunches. 1-8-216
How many aides? How much to pay them? 1-22-86; Many medical offices need more help, 1-22-86; Aides get larger pay increases now. 1-22-90
How not to hire the wrong girl. 2-5-223
Better to lose a patient than an aide? 2-19-178
What's wrong with this practice? 5-13-72; 6-10-72; 9-3-80; 10-14-80; 12-9-92
Aides can undermine an M.D.'s ethics. 6-10-249
A rule of thumb for paying part-timers. 6-10-204
Militant R.N.s may change your future. 8-19-122
The $100,000 embezzlement lesson. 9-16-94
These doctors run a phone school for aides. 9-16-172
Step up your productivity? Hiring more aides: How M.D.s feel about it, 9-30-73; The delicate business of delegating more, 9-30-76; The practice changes that promise to help most. 9-30-86
"House calls? My aides scout them for me." 10-14-108
Why bury your R.N. in the back room? 10-14-239
How to collect from a "skip." 10-28-162
Let a part-timer aid your aide? 10-28-159
Time to refine your office pay policies. 11-11-253
Why I won't fire my slowpoke aide. 11-11-174
How to help your tax adviser help you. 11-25-147
If they give your name as a reference. 11-25-270
Need gift ideas for colleagues and aides? 11-25-171
So you think your aide will jump at Keogh. 11-25-248
My aides helped redesign my office practice. 12-9-196

BILLING AND COLLECTIONS

The trouble with direct billing. 1-22-72
Ante mortem of a medical practice. 2-19-214
Credit card medicine: Will it catch on? 4-1-218
Don't rush into computer billing. 4-15-23
New: a billing service that lowers costs. 5-27-103
Have you outgrown your billing system? 6-10-103
Billing third parties: Color-coding can help. 7-8-184
For prompt payment in accident cases. 7-22-90
We won't let hospitals bill for our work! 8-19-179
99% collections with a judge's help. 10-14-206
How to collect from a "skip." 10-28-162

CARS

Foreign cars that keep their value. 1-8-113
A way out of the auto insurance mess. 1-22-236
New way to get low-cost car insurance. 3-4-23
Top tax experts advise you on: getting all the car deductions you can. 3-4-120
A new answer to the auto insurance mess. 6-10-130
The winning way to lease a car. 6-24-151
Head-on collisions: Had enough? 8-5-209
Incommunicado while driving? Not us! 9-16-196
How to cut legal risks after an auto crash. 10-14-203
The U.S. luxury car: a good buy? 10-14-75
When your patient shouldn't drive. 10-28-110
I've found the ultimate economy car. 11-11-212
Which cars hold their value best? 11-11-88

COLLEAGUES

The fine art of winning your point. 1-22-205
How careless referrals can hurt. 1-22-217
How to burn up your radiologist. 2-5-140
Need a 1,000-watt consultation? 2-5-262
O.K., dictate—but then please read it! 2-5-188
These doctors must *call a consultant.* 3-18-150
How to counter those antidoctor stories. 5-13-61
Asking a colleague to cover? Watch out! 5-27-61
When he claims he was injured on the job. 6-10-265
What doctors are writing to Dr. Spock. 8-5-179
What I *don't* want from a consultant. 8-19-92
Wanted: same-day reports from specialists. 9-16-202
"Salesmanship can make you a better doctor." 10-28-190
If they give your name as a reference. 11-25-270
Need gift ideas for colleagues and aides? 11-25-171

CONDENSATIONS

A new report to the President: "There's a crisis in U.S. health care." 1-8-248
A way out of the auto insurance mess. 1-22-236
An economist prescribes for medicine. 2-5-271
Can Republicans come up with a winner? 2-19-224
A top medicolegal expert charges: "President Kennedy's autopsy was bungled!" 3-4-248
"Organized medicine abuses its power!" 3-18-234
Insurrection in the U.S.? 4-1-226
The degeneration of Presidential elections. 9-16-207
What's wrong with guaranteed annual incomes? 9-30-275
Black rebellion & white reaction. 10-14-268

Antivert®

(meclizine HCl, niacin) tablets/syrup

Tablets: (meclizine HCl 12.5 mg. and niacin 50 mg.)
Syrup: (each 5 cc. teaspoonful contains meclizine equivalent to 6.25 mg. of meclizine HCl, and niacin 25 mg.)

For your patients with vertigo, Meniere's syndrome or allied disorders, specify Antivert—most widely prescribed anti-vertigo agent. Combining meclizine HCl against vestibular dysfunction and niacin for vasodilation, Antivert can provide substantial symptomatic relief in the great majority of patients.

Blue Shield moves toward Medicare fees. 1-8-25
Unorthodox way to raise fees. 1-8-223
The latest fees in five major fields. 2-5-68
Think twice before you adjust fees. 2-5-257
Psychotherapy: Do more, charge more. 4-1-171
"Doctors should declare a fee moratorium." 5-27-23
Freeze fees? "We'd better do it ourselves." 6-10-269

Continued on page 116

stops vertigo.

complete to moderate relief of symptoms in 9 out of 10 patients[1] 1. Scal, J. C.: Eye, Ear, Nose & Throat Month. *38*:738 (Sept.) 1959.

Precautions and contraindications: Frequent, short-lived reactions include: cutaneous flushing, sensations of warmth, tingling and itching, burning of skin, increased gastrointestinal motility, and sebaceous gland activity. In explaining these reactions to the patient, it is suggested that they be regarded as a desirable physiological sign that the niacin is carrying out its intended function of vasodilation. Because of this vasodilation, severe hypotension and hemorrhage are obvious contraindications to Antivert therapy. Although the incidence of drowsiness and other atropine-like side effects, such as dry mouth and blurring of vision, is low, the physician should alert the patient to the need for due precautions when engaging in activities where alertness is mandatory. **Use in women of childbearing age:** A review of available animal data reveals that meclizine exerts a teratogenic response in the rat. In one study, a dose of 50 mg./kg./day (50 times the maximum recommended human dose) produced cleft palate in 2 of 87 fetuses when administered to the rat at critical times during the first 15 days of gestation. At doses of 125 mg./kg./day, meclizine will produce 100% incidence of cleft palate in the rat. At doses of 25 mg./kg./day, decreased calcification of the vertebrae and relative shortening of the limbs were also produced in the rat, but experts disagree as to whether this is a teratogenic response. While available clinical data are inconclusive, scientific experts are of the opinion that this drug may possess a potential for adverse effects on the human fetus. Consequently, consideration should be given to initial use of a nonphenothiazine agent that is not suspected of having a teratogenic potential. In any case, the dosage and duration of treatment should be kept to a minimum.

Dosage: One tablet or one to two teaspoonfuls (5-10 cc.) t.i.d. just before meals. Specific requirements for individual patients should be determined by the physician.

Supplied: Tablets in bottles of 100 and 500. Syrup in pint bottles. Rx only.
